SIMLA, SATURDAY, JANUARY 10, 1959 (PAUS 20, 1880)

Separate paging is given to this Part in order that it may be filed as a separate compilation

## PART III—SECTION 2

Notifications and Notices issued by the Patent Office relating to  
Patents and Designs

## THE PATENT OFFICE

## Patents and Designs

Calcutta, the 10th January 1958

## CORRIGENDUM

In the Gazette of India, Part III, Section 2, dated 27th December 1958—

In page 360, Column 2, under the heading "Printed Specification published"—

delete entry No. "54355".

## Applications for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

26th December 1958

66235. K. N. Kashyap. A kidney hock.
66236. K. N. Kashyap. A malleable self-retaining retractor.
66237. L. S. Perez. Multi-frame single yarn sizing machine.
66238. The General Electric Company Limited. Improvements in or relating to control rod materials. (6th January 1958).
66239. Compagnie Generale De Telegraphie Sans Fil. Improvements in semi-conductive structures. (13th January 1958).
66240. Union Carbide Corporation. Gas shielded arc cutting. (6th January 1958).
66241. D. K. Dhand. An improved water cooler.
66242. Wolf Electric Tools Ltd. A paint removing disc. (24th April 1958).
66243. Union Carbide Corporation. Composition of matter.
66244. C. S. Prendergast. Improvements relating to rotary pumps and motors.
66245. C. S. Prendergast. Improvements relating to vane displacement pumps or motors.
66246. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Ortho-hydroxy-azo-dye-stuffs and process for their manufacture.
66247. S. Takita. Device for locking a loading arm of a draft device in spinning machines.
- 27th December 1958
66248. E. I. du Pont de Nemours and Company. Staple fibers from linear polyesters.
66249. Koppers Company, Inc. Improvements in or relating to method of and apparatus for making foamed polymeric structural materials.
66250. No-Sag Spring Company (Great Britain) Limited. Improvements in and relating to upholstery springs.
66251. Dunlop Rubber Company Limited. Improvements in belting. (4th January 1958).
66252. Dunlop Rubber Company Limited. A method and apparatus relating to the manufacture of pneumatic tyres. (10th January 1958).
66253. The Keelavite Company Limited. Improvements relating to pumps. (10th January 1958).
66254. Fielden Electronics Limited. Improvements relating to switching circuits. (16th January 1958).
66255. Stamicarbon N. V. Apparatus for separating particles according to specific gravity by the float-and sink method.
66256. A. Subervie. Process for preparing powdered ores suitable for feeding into apparatus for igneous agglomeration. (26th December 1957).
- 29th December 1958
66257. Kumeresh Chandra Das. An apparatus for keeping cooked food fresh and hot for one or more days.
66258. G. Singh. A new type of electrical storage cell which will store; and supply electrical energy; when required and its capacity to do so will be ten to two hundred or more times as great as compared to ordinary lead accumulator for the same volume and weight of cell.
66259. W. Zinkiewicz. Improvements in or relating to device for ground burrowing.
66260. N. V. De Bataafsche Petroleum Maatschappij. Process for the removal of soot from gases.
66261. W. P. Evans & Son Limited. Improvements relating to paper-making machines. (1st January 1958).
66262. W. P. Evans & Son Limited. Improvements relating to paper-making machines. (1st January 1958).
66263. W. P. Evans & Son Limited. Improvements relating to paper-making machines. (1st January 1958).
66264. Commissariat A L'Energie Atomique. Improvements in hall effect magnetometers.
66265. Paresh Nath Sarker. Improvement in variety producing steel rolling mill.
66266. Precision Valve Corporation. Method of and container for dispensing toothpaste.
66267. Societe Anonyme Des Manufactures Des Glaces Et Produits Chimiques De Saint-Gobain, Chauny & Cirey. A process for the separation of isotopes of alkali metals and apparatus for carrying out this process.
66268. Societe Des Electrodes Et Refractaires 'Savoie'. Process for the production of refractory articles having a high mullite content. (28th October 1958).
66269. Ciba Limited. A new active substance and process for isolating it from plant material.
66270. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Process for the manufacture of dihydroxycarotene compounds and esters thereof.
66271. Libbey-Owens-Ford Glass Company. Method and apparatus for bending glass sheets.
66272. V. H. Lodaya, V. C. Ajmera and S. A. Ajmera. Improvements in or relating to bracelets.

30th December 1958

66273. Hoesch-Westfalenhutte Aktiengesellschaft and Chamotte-Industrie Hagenburger Schwalb Aktiengesellschaft. Improvements in or relating to checker work for regenerative heating chambers for siemens-martin and other industrial furnaces.
66274. Les Laboratoires Dausse. Process for the production of urea compounds. [Addition to No. 65270].
66275. The General Electric Company Limited. Improvements in or relating to low pressure mercury vapour fluorescent electric discharge lamps. (6th January 1958).
66276. Maschinenfabrik Bueckhardt A.G. Improvements relating to compound cylinders.
66277. The Keelavite Company Limited. Improvements relating to hydraulic motor systems. (8th January 1958).
66278. The Patent Tiffin Carrier Sanghvi Co. Improvements in or relating to tiffin carriers.
66279. The Patent Tiffin Carrier Sanghvi Co. Electric toasters.
66280. Pharma Trading Co. (Private) Ltd. Securing device for crates.
66281. Libbey-Owens-Ford Glass Company. Apparatus for bending glass sheets.
66282. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to thiadiazols.
66283. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to a method of fusing a contact onto a semi conductive body.
66284. K. Abildgaard. Method for the production of phenyl-alkyne-diols. (2nd January 1958).
66285. Ciba Limited. A new urea derivative.
66286. Ciba Limited. Manufacture of new azo-compounds.
66287. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for the manufacture of alkali metal chlorites and alkaline-earth metal chlorites.
66288. Vapor Heating Corporation. Variable resistance device.
66289. G. R. Thakre. Improvements regarding folding hanger.

31st December 1958

66290. Merck & Co., Inc. Carbonyl analogs. (3rd February 1958).
66291. Merck & Co., Inc. Aniline derivatives. (3rd February 1958).
66292. Roskilde Medical Company Ltd. (R.M.C.) (Danske Andelsslagteriers Konserverfabrik A.m.b.A.). Method for the production and storage of metal-insulin compounds.

#### Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of this Gazette of India give notice to the Patent Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933 of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specification together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

60019. Holman Brothers Limited. Improvements in or relating to hoses. (28th March 1956). Accepted on 26th December 1958.

*Forming woven sheet material into tubular form and jointing with flexible layer or coating on one or both sides thereof.*

60521. Constock Liquid Methane Corporation. Apparatus for the conversion of gases. Accepted on 26th December 1958.

*Combination of heat exchangers, means conveying first and second gas through heat exchangers, means for compressing second gas after passing out through one of the heat exchangers and means for conveying a fluid in heat exchange relation with second gas as it leaves at least one of the compressors.*

60556. Council of Scientific and Industrial Research. A new method for the manufacture of spherical crystals of alkali halides. Accepted on 27th December 1958.

*Evaporating with stirring in vessel having element of asymmetry.*

60932. Ozalid Company Limited. Improvements in or relating to the preparation of paper and other fibrous base materials. (3rd July 1956). Accepted on 27th December 1958.

*Incorporating a photoconductive insulating material into the substance from which the base material is prepared.*

60946. Ricardo & Co., Engineers (1927) Limited. Improvements relating to internal combustion engines of the compression ignition type and to hot plugs for them. (5th July 1956). [Addition to No. 55493]. Accepted on 27th December 1958.

*Including combustion pocket into which air charge is forced through transfer passage to cause the charge to rotate in pocket, the fuel being injected into charge in pocket and surface of pocket over which circumferential portions of charge travel before passing over transfer passage is flat and at acute angles, and the surface before said surface is at an obtuse angle to flat surface and surface of pocket over which circumferential portions of charge travel after passing transfer passage is of curved form.*

60953. United Engineering and Foundry Company. Rolls for use as ultimate load carrying rolls and mills for reducing metal strip employing such rolls. Accepted on 31st December 1958.

*Ultimate load carrying roll has a land at one or more selected locations for limiting deflection along the length.*

60976. Babcock & Wilcox Limited. Improvements in tubulous heat exchange apparatus. Accepted on 31st December 1958.

*The tubular sections of the group of tube platen are rigidly united to form beam.*

61013. Maskinfabriken Phonix, A/S. Elevator and mobile storage rack. Accepted on 27th December 1958.

*Comprises a conveyor capable of moving along vertical plane, two sets of chain wheels or like, one of which forming upper chain wheels and other forming lower chain wheels and carriers mounted on chains of the wheels.*

61068. Foundry Equipment Limited. Improvements in or relating to ramming head for projecting sand into flasks, and a glade for such ramming head. (12th July 1956). Accepted on 26th December 1958.

*Blades mounted on the impeller head slope backwardly in relation to the direction of rotation and the tips of the blades are curved or bent forwardly.*

61100. Montecatini Societa Generale Per L'Industria Mineraria E Chimica. Process and apparatus for improving the dimensional stability of fibres obtained from crystallisable propylene high polymers. Accepted on 26th December 1958.
- Heating fibres under temperature conditions and for a time such that shrinkage would occur in the absence of mechanical restraint, whilst maintaining the fibres under tension.*
61190. Aluminium Laboratories Limited. Improvements in or relating to cleansing volatile hydrocarbons. nacesus material. (2nd August 1956). Accepted on 31st December 1958.
- Passing current through bed of fluidized fine particles in gas current.*
61191. Aluminium Laboratories Limited. Improvements in or relating to cleaning volatile hydrocarbons. (7th August 1956). Accepted on 31st December 1958.
- Vigorously mixing with 5-50 per cent strength aqueous nitric acid and separating the spirit from spent acid.*
61215. Kalamazoo Limited. Assembly of receipt or like slips. (1st August 1956). Accepted on 30th December 1958.
- Slips are connected along one marginal side portion in overlapping relationship in which upper marginal portion of each slip is removed from next below it.*
61319. Montecatini Societa Generale Per L'Industria Mineraria E Chimica. Crystalline butadiene polymers 1,4-cis configuration and process for preparing them. (29th July 1957). Accepted on 30th December 1958.
- Butadiene is polymerised in presence of a catalyst.*
61514. Commonwealth Scientific and Industrial Research Organization. Improvements in and relating to concrete, mortar or the like. (27th August 1956). Accepted on 27th December 1958.
- Cohesiveness and stiffness of cement paste is increased by adding polyelectrolyte.*
61589. Nippon Concrete Industry Co. Ltd. Electric poles made of steel-wire reinforced concrete. Accepted on 27th December 1958.
- Steel-wire frames with diameters of 6mm. or under whose diameter is given by equation:— $d=2.6^3\sqrt{H}$  for steel poles of 17 meters long or under.  
d=dia. of longitudinal steel frames and  
H=Length of pole.*
61746. Dorr-Oliver Incorporated. Contacting finely divided solids with gases in accordance with the so-called fluidized solids technique. Accepted on 31st December 1958.
- Characterized by utilizing sensible heat of solids in the cooling zone to vaporize a confined liquid.*
61898. Travenol International Inc. Oxygenator. Accepted on 27th December 1958.
- Comprising a flexible envelop having an oxygenating chamber, a defoaming chamber, passage means for introducing blood and oxygen to oxygenated chamber and passage means for removing oxygenated blood.*
62081. Standard Telephones and Cables Limited. Arrangement for the supervision of line conditions in telecommunication systems, especially in telephone systems. Accepted on 27th December 1958.
- There is allotted to each line for the testing of the line condition, a single switching element responsive to electrical condition of the line and having a saturation characteristic.*
62089. George Angus & Company Limited. Improvements in and relating to fibre-contacting elements. Accepted on 26th December 1958.
- Comprising a vulcanised synthetic rubber composition containing as an ingredient an aliphatic organic compound.*
62197. Cleveland Electro Metals Co. Improvements in or relating to method of treating molten steel and means therefor. Accepted on 31st December 1958.
- Positioning a vertical elongated aluminium bar close to the mid-plane in the ingot mould equally spaced from the ends  $1/3$  to  $1/2$  the width of the ingot mould.*
62223. Imperial Chemical Industries Limited. Polymeric isocyanates and their manufacture. (16th November 1956). Accepted on 29th December 1958.
- Contacting polyisocyanate with atleast one basic catalyst selected from the group consisting of alkali and alkaline earth metal oxides, hydroxides, carbonates, alcoholates and phenates, alkali metal salt of enolisable compounds and metallic salts of weak aliphatic and alicyclic carboxylic acid.*
62463. Cilag Limited. New 1-aza-(2,3:5,6)-dibenzocycloheptadiene derivatives, their acid salts and quaternary salts, and the production thereof. (21st December 1956). Accepted on 27th December 1958.
- Introducing an aminoalkyl radical into an azadibenzocycloheptadiene.*
62471. Commissariat A L'Energie Atomique. Improvements in valves for controlling gas streams flowing at very low flow rates. Accepted on 27th December 1958.
- Consisting in combination, an elongated hollow body including a transverse partition provided with a hole of circular cross section forming a valve seat, an elongated member mounted in said body, one end of said member having a conical end to form a valve needle co-operating with the valve seat.*
62762. Sandoz Ltd. Process for the manufacture of new phenothiazine derivatives. (31st October 1957). Accepted on 29th December 1958.
- 3-alkyl or aralkyl-mercapto-phenothiazine is reacted with a  $\beta$ -halogen-methyl-piperidyl derivative.*
63244. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Process for the manufacture of tetrahydrofurfuryl ammonium compounds. Accepted on 26th December 1958.
- By subjecting 2-methyl-3-oxo-tetrahydrofuran 5-carboxylic acid or esters thereof, to steps comprising reduction of oxo to hydroxyl and conversion of carboxy to quaternized aminomethyl.*
63273. Veb Glühlampenwerk Plauen. Electric bulb for vehicle searchlights. Accepted on 27th December 1958.
- Dim-out cap is welded under an angularly bent electrode at the angular shank of which the secondary filament is connected.*
63364. R. Rummel. A process for the gasification of liquid fuels. (18th December 1957). Accepted on 27th December 1958.
- Wherein gas produced from a liquid fuel by gasification is washed with a liquid fuel after the gas has given off part of its sensible heat.*
63369. Westinghouse Brake & Signal Company Limited. Improvements relating to pressure braking systems for vehicles. (22nd March 1957). Accepted on 27th December 1958.
- Connection of train pipe to 'load' brake cylinder is delayed upon the initiation of a brake application by a closed valve located in the connection between train pipe and 'load' brake cylinder.*
63442. T. Nomura. Improvements in or relating to circuit for secrecy of conversion in telephones. Accepted on 26th December 1958.
- For secrecy of conversation employing a condenser, a relay and an electromagnet and the circuit is coupled in shunt or series with the telephone line near the line terminals of each of the sub-station circuits on the same party line.*
63543. Spofa. Spojene Farmaceuticke Zavody. A preparation of a new type of quaternary salts. Accepted on 26th December 1958.
- Reacting trialkylamine with esters of higher fatty acids.*

63550. Organon Laboratories Limited. New 19-norsteroid compounds and process for the preparation thereof. Accepted on 27th December 1958.

*Converting 17-oxo steroid compound by addition reaction into corresponding 17-hydroxy compound substituted in addition in 17-position by alkynyl or alkenyl radical.*

63646. American Steel Foundries. Improvements in a railway draft gear. Accepted on 29th December 1958.

*Housing encloses independent parallel spring and closed end provides a rear abutment the forward end provided with inwardly facing arcuate surfaces.*

63715. Societe Des Accumulateurs Fixes Et De Traction. Method of and device for assembling and mounting electrical storage batteries. Accepted on 27th December 1958.

*Disposing within container against its inner walls and vertically detachable supports and suspending from these supports above the bottom of the container, cells by means of co-acting members carried by battery elements and by supports.*

63821. Imperial Chemical Industries Limited. Textile treatment process. (24th June 1957). Accepted on 30th December 1958.

*Finishes for improved resistance to wet treatments comprising water sensitive finishing agent and mono or dihalogeno 1:3:5-triazine.*

63906. Hotchkiss-Brandt. Improvements in and relating to a self-propelled projectile. Accepted on 26th December 1958.

*Comprising an ejectable obturating and igniting device which is disposed in the nozzle of ejection of the self-propelling gases.*

63937. Commissariat A L'Energie Atomique. Improvements in the manufacture of microporous metallic tubes consisting mainly of nickel. Accepted on 27th December 1958.

*Crushing in moist state nickel, coating the grains formed with a binder volatile at 200-400°C, extruding the paste thus obtained to give it the form of tubes.*

64143. Dr. Ing. F. H. Stradtman. Process for the production of tubes and other hollow bodies of substantially cylindrical cross-section. Accepted on 31st December 1958.

*Hollow body and first produced with generally flat cross-sectional form by welding together metal strip or strips and is then formed to substantially cylindrical cross-section.*

64288. Lindauer Dornier Gesellschaft m.b.H. A fast reed warp protector motion. (13th June 1957). Accepted on 27th December 1958.

*The tongue is retained in the raised position by a fixed circular cam during the shuttle cross-over a finger attached to the tongue so that it will pass over the frog when the shuttle is in the box.*

64333. Ciba Limited. Method of and apparatus for producing granulates by spray drying. Accepted on 31st December 1958.

*By means of a spraying device in a drying chamber in which a collecting member is arranged in the path of small sprayed particles.*

64445. A. J. Buchi. Improvements in or relating to casings for centripetal gas turbines. Accepted on 31st December 1958.

*Wherein gases for driving the turbine are supplied to a side of the casing and are conveyed therefrom to around the diffuser of the turbine.*

64796. George Angus & Company Limited, M. Balkin and D. G. Turner. Improvements in the production of reinforced endless rubber belts or bands. Accepted on 31st December 1958.

*Comprising winding the cord on to a layer of rubber on a cylindrical mandril.*

65669. Trubenised Company (Registered Trust). Improvements in collars for wear. (31st October 1957). Accepted on 26th December 1958.

*Having its fold line defined by a strip of flexible sheet material inserted in and located by a pocket formed between two of the collar plies.*

#### Printed Specification Published

A limited number of printed copies of the undernoted specifications are available for sale from Officer-in-Charge, Government of India, Central Depot, 8, Hastings Street, Calcutta, at two rupees per copy:—

53880.	53943.	53959.	54203.	54389.	54539.	54542.	54551.
54578.	54743.	54781.	54974.	55004.	55186.	55247.	55254.
55398.	55400.	55401.	55588.	55674.	55703.	55756.	55808.
56132.	56173.	56228.	56259.	56306.	56339.	56357.	56425.
56449.	56461.	56475.	56554.	56559.	56612.	56627.	56675.
56676.	56687.	56848.	56920.	56927.	57117.	57178.	57241.
57313.	57330.	57371.	58089.				

#### Correction of Clerical Errors

Under Section 62 of the Indian Patents and Designs Act, 1911, certain clerical error occurring in specification No. 60357 was corrected on 27th December 1958.

#### Patents Sealed

47858.	58740.	58902.	58903.	59419.	59481.	59497.	59504.
59505.	59578.	59606.	59736.	60545.	60637.	60813.	60814.
60866.	60889.	61189.	61205.	61439.	61455.	61475.	61587.
61655.	61690.	61741.	61825.	61924.	62058.	62110.	62237.
62263.	62302.	62366.	62773.	62814.	62850.	63100.	63258.
63287.	63308.	63602.					

#### Amendment Proceedings

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911, that Desh Pal Ahuja of L.S. Davar & Co., Norton Buildings, Calcutta 1, West Bengal, a citizen of Indian Republic, seek leave to amend the name, nationality and address of the Applicant in the application, specification and drawings in respect of Patent Application No. 59286. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (Form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta 17. The proposed amendment may be seen free of charge at the Patent Office, on payment of the usual charges.
